

## **Epic Lift Systems Reaches Employee Safety Milestone**

Fort Worth, TX (October 12, 2016) - Epic Lift Systems LLC (“Epic” or the “Company”) is pleased to announce that it has been over a year since the Company has recorded an employee safety incident. Epic’s senior management team is proud of the commitment from the Company’s employees to follow safe operating procedures, and the subsequent safety track record this joint-effort has produced.

David Nemeskal, Epic’s Chief Executive Officer said “We are committed to continuous improvement in all areas of the Company, and safety is a priority reflected in our company culture. We are proud of our employee’s daily recognition of our “Fight Complacency” program, which challenges each employee to stop and think about potential dangers of the job before they arrive on site.”

Greg Vick, Director of Safety at Epic, added “Safety is more than a metric at Epic. We look at leading indicators that could help with risk prevention and mitigation to reduce incidents further. This analysis helps improve our work processes and advances our ongoing pursuit of operational excellence.”

### **About Epic Lift Systems:**
